- Designed a highly intuitive application to optimize the ease and speed of writing and printing reviews

PROJECTS

RESTAURANT FINDER WEB APPLICATION

PROJECT: CRAVE FINDER (TEAM OF 4)

January 2023 – June 2023

- Built and deployed a [restaurant finder web app](#) that allows users to search for a restaurant in a given city and rate dishes
- Applied Scrum framework & managed tasks via GitHub issues
- Implemented session-based user management & developed data storage and retrieval features with JSON responses in Go
- Created back-end unit tests and documented the Go API
- Integrated the Yelp Fusion API to retrieve restaurant data
- Implemented and hosted a MySQL database on Oracle Cloud
- Developed Angular components that make HTTP requests, used Angular Material for UI & routing for seamless navigation

WASTE PREVENTION OF MEDICAL PRODUCTS |
LEAD BACK-END DEVELOPER

PROJECT: O'MÉDOCS (TEAM OF 4)

April 2021 – May 2021

- Built and deployed an [e-commerce website](#) for medical professionals to buy and sell medicines that expire in a few months (otherwise thrown away)
- Aimed to reduce the \$1.1 billion annual waste of medical products in France and cure more patients
- Created a RESTful API with Node.js/Express using CORS to communicate with the React/Redux front-end client
- Implemented JWT token-based authentication
- Performed SQL data migrations in PostgreSQL
- Led daily Scrum meetings
