## PROJECTS

RESEARCH COLLABORATION | PALLAS'S HUB (*Team of 5*)

PROJECT MANAGER / FULL-STACK DEVELOPER

August 2024 – December 2024

- Built and deployed a [research collaboration web app](#) in React (with Mantine) – Go (with Echo) that enables researchers to collaborate & search for funding opportunities
- Implemented user registration & JWT token authentication
- Built password recovery with code validation using Gmail
- Developed real-time group messaging with message reply, edit, and delete features via WebSocket
- Created group management features to enable owners to manage members, requests, and group deletion
- Implemented advanced filtering to find threads & grants by keyword, category, deadline & amount ranges, and sorting options

RESTAURANT FINDER | CRAVE FINDER (*Team of 4*)

FULL-STACK DEVELOPER

January 2023 – April 2023

- Built and deployed a [restaurant finder web app](#) that allows users to search for a restaurant in a given city and rate dishes
- Applied Scrum framework & managed tasks via GitHub issues
- Implemented session-based user management & developed data storage and retrieval features with JSON responses in Go
- Created back-end unit tests and documented the Go API
- Integrated the Yelp Fusion API to retrieve restaurant data
- Implemented and hosted a MySQL database on Oracle Cloud
- Developed Angular components that make HTTP requests, used Angular Material for UI & routing for seamless navigation

PREVENT WASTE OF MEDICINES | O'MEDOCS (*Team of 4*)

LEAD BACK-END DEVELOPER

April 2021 – May 2021

- Built and deployed an [e-commerce web app](#) for medical professionals to buy and sell medicines that expire in a few months (otherwise thrown away)
- Aimed to reduce the \$1.1 billion annual waste of medical products in France and cure more patients
- Created a RESTful API with Node.js/Express using CORS to communicate with the React/Redux front-end client
- Implemented JWT token-based authentication
- Performed SQL data migrations in PostgreSQL
- Led daily Scrum meetings
