• Problem-solving

WORK EXPERIENCE

EYROLLES | SOFTWARE ENGINEER INTERN
INTERNSHIP | Paris, France

June 2021 – August 2021

• Built a Symfony application to search among thousands of publications, write reviews (called "coups de coeur"), and print them in banner format

• Developed Twig templates enhanced by a responsive design using CSS & Bootstrap framework

• Integrated PHP object-oriented design principles

• Designed a highly intuitive application to optimize the ease and speed of writing and printing reviews

PROJECTS

RESTAURANT FINDER WEB APPLICATION
PROJECT: CRAVE FINDER (TEAM OF 4)

January 2023 – April 2023

• Built a restaurant finder web application that allows users to search for specific restaurants or food items in a given city and rate these items

• Developed user registration/login/logout, password management, and multiple search features in Golang

• Integrated the Yelp Fusion API to get restaurant data

• Implemented a MySQL database hosted on Oracle Cloud

• Created backend unit tests and documented the Go API

• Developed Angular components that communicate with backend endpoints

WASTE PREVENTION OF MEDICAL PRODUCTS | LEAD BACK-END DEVELOPER
PROJECT: O'MÉDOCS (TEAM OF 4)

April 2021 – May 2021

• Built and deployed an e-commerce website for medical professionals to buy and sell medicines that expire in a few months (otherwise thrown away)

• Aimed to reduce the $1.1 billion annual waste of medical products in France and cure more patients

• Created a RESTful API with Node.js/Express using CORS to communicate with the React/Redux front-end client

• Implemented JWT token-based authentication

• Performed SQL data migrations in PostgreSQL

• Led daily Scrum meetings
